A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/18/2006 has been entered.

In view of the amendments to claim 5 and arguments presented by applicant, claims 5-6, directed to the process for manufacturing the stencil, have been rejoined with product or stencil claims.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 14 is rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for first coating which is tungsten nitride, does not reasonably provide enablement for a first coating which includes a nitride which includes a variety of materials not disclosed by the originally filed specification such as aluminum nitride, boron nitride, etc. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention commensurate in scope with these claims.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 6 and 16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 16 is confusing since it is unclear whether applicant is claiming the second coating in its entirety provides the means for controlling the running property of the adhesive or a component of the second coating provides the means for controlling the running property of the adhesive. Note if applicant is claiming the second coating in its entirety provides the means for controlling the running property of the adhesive then an objection of claim 16 under 37 CFR 1.75 as being a substantial duplicate of claim 11 will follow in the next office action. When one employs means plus function language in a claim such as means for controlling for controlling a running property of an adhesive as set forth in claim 16 then applicant must set forth in the specification adequate disclosure showings what is meant by that language. If applicant fails to set forth an adequate disclosure, then applicant has failed to particularly point out and distinctly claims the invention required by the second paragraph of section 112. See *in re Donaldson Co.* 16 F.3d 1189,1195 29 USPQ2d 1845,1850 (FED. CIR.1994). Note if the means for controlling the running property of the adhesive is a polymeric material then an objection of claim 16 under 37 CFR 1.75 as being a substantial duplicate of claim 4 will follow in the next office action. It is unclear how the recitation in claim 6 of spreading the printable material using a docking blade further limits the process for manufacturing the stencil as set forth in independent claim 5 upon which claim 6 depends.

Claims 1-5, 8-13,15 and 17-21 are allowed.

Claim 6 and 16 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
